Update on status of Glenbard West

The following is an update regarding the May 9 electrical fire at Glenbard West.

As officials are determining the extent of the damage from the fire and safety of the building, school officials are fine-tuning educational plans for next week.

We are working to ensure that all systems have been inspected and the school is safe for all students and staff members.

Glenbard West administrators are working with local police and fire officials, utility companies, and environmental experts. Our top priority is ensuring a safe environment for all students and staff members.

In cooperation with the above agencies, Glenbard is working with the DuPage County Regional Office of Education to determine what, if any, makeup days will be required.

Administrators are meeting today, discussing options that appropriately meet all students' needs. Please check this Web site on Friday, May 11, for updates regarding educational plans for next week.

We also will update this information through GLENBARD-NEWS email. You may subscribe to GLENBARD-NEWS on West's Web site.

There were no injuries in the May 9 fire.
