

FACILITY PLANNING COMMUNITY FORUMS

GLENBARD DISTRICT 87

JOIN US AT AN UPCOMING FACILITY PLANNING COMMUNITY FORUM

LEARN ABOUT GLENBARD HIGH SCHOOL DISTRICT 87'S FACILITY NEEDS and the development of a new 10-year facility plan to address those needs and support our students.

Glenbard's four high schools range in age from **50 to 100 years old**, and each has a variety of capital improvement needs. Additional funding will be needed to support the new plan.

Complete necessary warm/safe/dry projects.

Improve safety and address entryway congestion.

Accelerate renovation of science labs.

Enhance access to student resources, including college and career counseling.

Create spaces to support Profile of a Graduate learning experiences.

Glenbard's new long-range facility plan will consider **safety, instructional best practices and opportunities to connect and collaborate**. The plan will create spaces to support learning experiences aligned with our Profile of a Graduate. A Glenbard graduate communicates, thinks critically, embraces diversity, creates, collaborates and is self-empowered.

▼ We want to hear your thoughts. Join us for a Facility Planning Community Forum at any of our high schools.

*The community forums will be an **open house** format from **5:30 to 8 p.m.** Stop by any time to learn more and take a building tour.*
